Dear Members and Guests,

It is our great honour to welcome you on behalf of the Local Organizing Committee to the 46th Annual Meeting of the International Society for the Study of the Lumbar Spine (ISSLS) in Kyoto, Japan. ISSLS’ Annual Meeting was first held in Japan in 1989. Thirty years on, we are excited to once again host the Meeting, this time in Kyoto.

With over 1,200 years of history, Kyoto boasts wonderful historic scenery along with traditional architecture and beautiful nature. At the same time, Kyoto is a city of learning and creation with cutting edge universities, research institutions and companies. This harmony of preserving tradition while continually innovating is a uniquely attractive feature of Kyoto. Kyoto has 17 UNESCO World Heritage Sites and over 2,000 temples and shrines. The history of harmony that has been built in Kyoto over the centuries has created a culture of hospitality that can be experienced not only at our meeting facilities and accommodation but also throughout the city.

Our half-day outing for everyone will take us to Kinkaku-ji Temple (Golden Pavilion), Ryoan-ji Temple, and Nijo-jo Castle, all three of which are World Heritage Sites. Kinkaku-ji Temple is richly adorned in gold leaf and reflects beautifully in the water and it is best seen reflected in the adjoining "mirror pond". In contrast to Kinkaku-ji Temple, Ryoan-ji Temple is simple and renowned for its mysterious rock garden. Try to find fifteen rocks in the garden at Ryoan-ji Temple from any single vantage point. At Nijo-jo Castle, walk down the “Nightingale Hallway” and notice the birds singing, a feature uniquely designed to detect intruders walking the halls. At the end of the tour, take in the graceful ambience of a traditional Japanese house while enjoying a dinner of Italian cuisine at Sodoh Higashiyama Kyoto.

The meeting venue, Kyoto Hotel Okura, is located downtown and is convenient to access anywhere in Kyoto city. For the scientific program, there has been a record number of abstracts submitted this year and the program committee members chose oral and poster presentations according to peer review. In addition, they have arranged a wonderful program with special lectures and a symposium for the latest and greatest topics. We hope this meeting will be memorable for you all.

We are looking forward to meeting you at the 46th Annual Meeting of ISSLS in Kyoto.

Sincerely,
Shin-ichi Konno & Miho Sekiguchi (Local hosts)

MESSAGE FROM THE PRESIDENT

Dear friends and colleagues,

On behalf of the ISSLS Executive Committee, welcome to Kyoto! Our 46th Annual Meeting is being hosted in Japan for the second time, with the previous meeting also held in Kyoto, 30 years ago! The former capital of Japan, Kyoto is of great historical and cultural importance, with a dazzling array of things to do and see, including 17 UNESCO World Heritage Sites!

Our local hosts, Drs. Miho Sekiguchi and Shinichi Konno, and the local organizing committee have worked diligently to plan our time in Kyoto. The Program Committee, under the leadership of Dr Scott Blumenthal, has assembled a high-quality and interesting program of scientific presentations, debates, and symposia. For the first time, we will have a podium session highlighting the highest-scoring abstracts submitted to this meeting. As always, we look forward to active and vigorous discussions!

The Award Ceremony on June 6th will honor one of our most respected senior members with the Wiltse Lifetime Achievement Award. The prestigious ISSLS Prizes will be presented at a special session on the same day. We have two invited lectures. Dr. Eric Grant from the Radiation Effects Research Foundation will deliver the Harry Farfan Presidential Lecture on June 5th and Professor Osamu Honmou from Sapporo Medical University will be our guest for a lecture on cell transplantation on June 6th.

The traditional ISSLS outing will allow us to explore some of the classic sites of Kyoto, including the Ryoan-ji Temple, the Kinkaku-ji Temple, and the Nijo-jo Castle. We will conclude at Sodoh Higashiyama for something to eat and refreshments. The Accompanying Person’s program covers other great sites in and around Kyoto.

At the conclusion of the ISSLS program, a half-day symposium will be held, titled the Mechanism of Low Back Pain - Recent Advancement. I encourage you all to stay for what promises to be an informative session on a most relevant topic.

I look forward to seeing you all in Kyoto.

Tom Oxland
President ISSLS 2018-2019
UPCOMING MEETINGS

2020 Annual meeting combined with Spineweek, Melbourne, Australia

April 27 - May 1, 2020
Local hosts: Robert Gunzburg
Deadline for abstracts: October 15, 2019 (please note early deadline)

2021 Annual meeting in Milan, Italy

May 31 - June 4, 2021
Local hosts: Stefano Boriani and Fabio Zaina
Deadline for abstracts: November 15, 2020

2022 Annual meeting in North America

To be decided on at the Second Business meeting in Kyoto, Japan. One site proposal has been received:

- Boston - local hosts James Kang and Andrew Schoenfeld
FELLOWSHIPS AND AWARDS

YOUNG INVESTIGATOR TRAVEL AWARD
Sponsored by Eisai Co.
Prize Ceremony for Recipients
Fellowship Award Ceremony
Thursday June 6 at 09:30

CLINICAL TRAVELLING FELLOWSHIP
Sponsored by Seoul Chuk Hospital
Announcement of this year’s recipient
Report from last year's recipient: Xialong Chen, China
Fellowship Award Ceremony
Thursday June 6 at 09:30

ISSLS RESEARCH GRANT
Sponsored by Taisho Pharmaceutical Co.
Announcement of this year’s recipient
Report from last year’s winner: Hugo Massé-Alarie
Fellowship Award Ceremony
Thursday June 6 at 09:30

WILTSE LIFETIME ACHIEVEMENT AWARD CEREMONY
An annual award for exceptional achievement in the spinal field.
Announcement of this year’s winner
Winner from 2017: Robert Fraser
Fellowship Award Ceremony
Thursday June 6 at 09:30

THE ISSLS PRIZE FOR LUMBAR SPINE RESEARCH
Sponsored by European Spine Journal
Announcement of this year’s recipients
The prize-winning papers will be presented on Thursday, June 6 at 10:20

BEST PAPER AND POSTER AWARD
A special best paper award session with selected papers will be presented and judged by
the Program Committee on Tuesday June 4 at 13:30
SOCIAL PROGRAM

(Included in registration fee for all fully registered delegates/accompanying persons. Additional tickets may be purchased at the registration desk, pending availability)

WELCOME RECEPTION - Monday June 3 - 18:00 – 20:00
Kyoto Hotel Okura, 4F, Gyouin Hall

Please be sure to arrive on time as there will be an exclusive performance by world-renowned opera singer Michiê Nakamura on stage.

AFTERNOON OUTING – Wednesday June 5 from 12:30

Ryoan-ji Temple
Japan’s most famous “hiraniwa” (flat garden void of hills or ponds), reveals the stunning simplicity and harmony of the Principles of Zen meditation. Ryoan-ji Temple is famous for its mysterious rock garden, the most celebrated in Japan, which defies attempts at explanation. Enclosed by an earthen wall, fifteen carefully placed rocks seem to drift in a sea of raked white gravel. A viewing platform right above the garden gives visitors an unimpeded view, although from whatever angle you view the garden, you can never see all fifteen stones.

After pondering the garden’s “sermon in stone”, you can stretch your legs with a tour of the extensive grounds of Ryoan-ji Temple, which includes larger gardens with trees and moss and the Kyoyo-ji pond, which is particularly striking in autumn.

Kinkaku-ji Temple
The image of the temple richly adorned in gold leaf reflects beautifully in the water of Kyokochi, the mirror pond. It is perhaps the most widely-recognized image of Kyoto.

Seen reflected in the adjoining “mirror pond” with its small islands of rock and pine, Kinkaku-ji Temple, “The Golden Pavilion” is a breathtaking must-see.

The building’s first purpose was to serve the retiring Shogun Ashikaga Yoshimitsu (1358-1409) as a residence. The gold-leaf-adorned building was converted into a Zen temple shortly after his death. In an event that was later fictionalized by the renowned author Yukio Mishima, a 21-year-old monk burned Kinkaku-ji Temple down in 1950. The temple was rebuilt in 1955 and continues to function as a storehouse of sacred relics.

Nijo-jo Castle
The gorgeous style of this castle was intended as a demonstration of Shogun Tokugawa Ieyasu’s (1542-1616) prestige.

Nijo-jo Castle was the residence of the Tokugawa Shoguns in Kyoto, who ruled Japan for over 260 years from 1603 to 1868. It remains an eloquent testimony to their power. The wide moat, massive stone walls, and heavy yet elaborate gates are still impressive and were the only fortifications the inhabitants felt necessary, so firm was their grip on power.

The grounds are large and contain several lovely gardens as well as groves of plum and cherry trees. The palace building itself is imposing, yet upon closer examination, is rich in decorative detail.

GALA DINNER - Thursday June 6 at 19:00
Kyoto Hotel Okura 3F Suiun

At the start of the Banquet, Geiko will arrive and there will be a traditional performance on stage. Please arrive at 18:50 to be seated before the performance.

During the performance, please remain seated and do not move around the banquet hall. After the performance, she will come to each table to serve drinks and there will be a photo opportunity with her. The Banquet will be an extraordinary event and experience of traditional Japanese culture. Please enjoy the dinner with a selection of wine.
ACCOMPANYING PERSONS PROGRAM

Tuesday June 4 - Bus departs at 09:00 (7-8 hours)
Japanese Lunch at Suiran

*Wear comfortable clothing and walking shoes as this tours will be on foot.

Arashiyama & Sagano Bamboo Grove

Arashiyama is one of the most popular sightseeing districts in Kyoto. It is a great escape from the city. You will enjoy walking through the beautiful Sagano Bamboo Forest pathway, where there are plenty of opportunities to take photos.

Tenryu-ji Temple

Tenryu-ji temple, registered as a UNESCO World Heritage site, was ranked first among the city’s five great Zen temples. The main attraction of Tenryu-ji Temple is the zen garden, which was created by the famous garden designer Muso Soseki in the 14th century.

After sightseeing and lunch, you can experience Kyoto cultures and traditional arts through crafting at Kyoto Handcraft Center. Your hand-made items will be the best souvenirs.

Folding Fan Painting

Enjoy the experience of making Japanese handicraft!
You will paint on an unfolded fan as you like.
When it is dry, it will be fastened at the end with a catch.

Thursday June 6 - Bus departs at 09:00 (6 hours)
French Lunch at Funatsuru

*Wear comfortable clothing and walking shoes as there will be 1½ hours of walking

Fushimi Inari Shrine

Fushimi Inari Shrine is a Shinto shrine, which was voted Kyoto’s top tourist destination by foreign visitors. Inari is the Shinto God of Rice.

Thousands of red torii (shrine gates) straddle a network of trails behind its main buildings. At the entrance stands the Romon Gate, donated in 1589.

Behind that is the shrine’s main hall (honden). Individuals and companies have been donating torii for around 400 years. These symbolize prosperity and profitability. You will find the names of the donors inscribed on the back of each gate.

Tofukuji Temple

Tofukuji is a large Zen temple, founded in 1236 by the Fujiwara clan. There are unique gardens surrounding the building on all sides, with particularly beautiful views from the Tsutenkyo Bridge. The 22m tall Sanmon Gate is the oldest Zen gate of its kind, dating back to 1425.

Sanjusangendo

After lunch, we will visit Sanjusangendo, which was originally built in 1164. The original temple building was lost to fire, but reconstructed in 1266. Measuring 120m, the temple hall is Japan’s longest wooden structure. The building houses 1,001 wooden statues of Kannon (the thousand-armed Goddess of Mercy).
HARRY FARFAN PRESIDENTIAL LECTURE

DR ERIC GRANT
Health effects of ionizing radiation exposure - what we’ve learned from the atomic bomb survivors

Eric Grant is the Associate Chief of Research at the Radiation Effects Research Foundation (RERF) in Hiroshima and Nagasaki, Japan. Dr Grant received his BSEE from the University of Michigan and his PhD in Epidemiology from the University of Washington. Eric worked as a computer programmer and a biomedical engineer prior to working for RERF.

RERF’s mission is to study the long-term health effects due to exposure to ionizing radiation from the atomic bombings. Dr Grant’s recent publication focused on the radiation risks of solid cancer incidence among the Life Span Study of atomic bomb survivors. Dr Grant has also authored manuscripts on indirect effects of radiation exposure, specifically hormonal changes among women after whole-body exposure, and on the lack of evidence of trans-generational mortality effects of radiation exposure among the children of the atomic bomb survivors.

Dr Grant has recently been put in charge of developing RERF’s “Research Resource Center”, an institutional repository designed to safeguard RERF’s varied resources (data, paper, physical artifacts, etc.) as well as integrate research data with biosample inventories. This integrated resource center along with updated policies for data sharing should facilitate RERF’s own research as well as improve opportunities for collaborative research in the future.

INVITED SPEAKER

PROFESSOR OSAMU HONMOU
Cell therapy for spinal cord injury

Dr. Osamu Honmou, M.D., Ph.D. is the chairman and Professor in the Department of Neural Regenerative Medicine at Sapporo Medical University School of Medicine in Japan. He received his M.D. from Sapporo Medical University in 1989 and obtained his Ph.D. in Medicine from the same institution in 1999. After completing his neurosurgical residency at Sapporo Medical University Hospital, he moved to New York University Medical Center in the U.S. in 1991, where he first studied basic neuroscience. He then moved to Yale University in 1992 and began working on projects in the field of neural regeneration. He has served as a Lecturer in Neurology at Yale University School of Medicine since 1995.

He returned to Sapporo Medical University in 1995 as an Assistant Professor in the Department of Neurosurgery and launched a neuroscience and regeneration research laboratory. He conducted a pilot clinical study on autologous mesenchymal stem cells derived from bone marrow for stroke patients in 2006-2007. He became a Professor in the Department of Neural Repair and Therapeutics in 2008 and was appointed as the chairman of and Professor in the Department of Neural Regenerative Medicine at Sapporo Medical University in 2011. He is a board-certified neurosurgeon in Japan and also holds a Visiting Assistant Professorship in the Department of Neurology at Yale University School of Medicine.

Currently, he is leading a team that is conducting a phase III, double-blinded, placebo-controlled, randomized clinical trial in patients with stroke that started in 2013. He also launched a clinical trial of intravenous administration of autologous mesenchymal stem cells in patients with spinal cord injury at Sapporo Medical University in 2013. His professional specialties are central nervous system diseases and his main research objectives are to pursue a better understanding of these diseases at a fundamental level and to develop regenerative therapies with innovative approaches.

11:00-11:40  PRESIDENTIAL ADDRESS – TOM OXLAND
“ISSLS – Who are we?”
Introduction by Kazuhiro Chiba

11:40-12:20  HARRY FARFAN PRESIDENTIAL LECTURE – DR ERIC GRANT
Radiation Effects Research Foundation of Hiroshima and Nagasaki
“Health effects of ionizing radiation exposure – what we’ve learned from the atomic bomb survivors”
Introduction: Tom Oxland

AFTERNOON OUTING
Meeting place: 4F Auditorium
First bus departs at 12:30
A boxed lunch will be provided
(See Page 5 for full details)

THE ISSLS PRIZE FOR LUMBAR SPINE RESEARCH

10:20-10:30  ISSLS PRIZE INTRODUCTION

10:30-11:30  ISSLS PRIZE AWARD CEREMONY  
Chair: Björn Rydevik

10:30-10:40  Clinical importance of trunk muscle mass for low back pain, spinal balance, and quality of life: A multicenter cross-sectional study  

10:40-10:50  Discussion

10:50-11:00  Physical activity attenuates fibrotic alterations to the multifidus muscle associated with intervertebral disc degeneration  
Paul Hodges, G. James, D. Klyne, M. Millecamps, L. Stone, Australia

11:00-11:10  Discussion

11.10-11:20  Biomechanical changes in dynamic sagittal balance and lower limb compensatory strategies following realignment surgery in adult spinal deformity patients.  
Jeannie Bailey, R.P. Matthew, S. Seko, P. Curran, L. Chu, S.H. Berven, V. Deviren, S. Burch, J. Lotz, USA

11:20-11:30  Discussion

11.30-12:20  INVITED LECTURE – PROFESSOR OSAMU HONMO  
Molecular Medicine and Neural Repair and Therapeutics, Sapporo Medical University School of Medicine, Japan  
“Cell Therapy for Spinal Cord Injury”  
Chair: Shin-ichi Konno

12:20-13:30  Lunch  
Location: Suiun (3F)

13.30-14:30  SESSION #10 BASIC SCIENCE, IMAGING  
Chairs: Asseem Sharma & Daisuke Sakai

13:30-13:35  Ultrasound measurement of the skin as a potential marker of bone quality: A prospective pilot study of patients undergoing lumbar spinal fusion  

Wing Moon Raymond Lam, L. Liu, M. Wang, J. Li, C. Goh, H. Wong, Singapore

13:44-13:49  The impact of obesity, diabetes, and epidural steroid injections on regional Bone Mineral Density (BMD) measured by Quantitative Computed Tomography (QCT) in the lumbosacral spine  
Ichiro Okano, C. Jones, S.N. Salzmann, C. Ortiz Miller, T. Shirahata, C. Rentenberger, J. Shue, J.A. Carrino, A.A. Sama, F.P. Cammisa, F.P. Girardi, A.P. Hughes, USA

Hanna Hebelka, K. Lagerstrand, H. Brisby, P. Owen, D. Belavy, Sweden

13:58-14:03  Feasibility of lumbar disc lamellar measurement with in-vivo ultrasonography  
Claudio Vergari, T. Langlais, P. desprairies, P. Rohan, R. Pietton, J. Dubousset, J. Meakin, C. Winlove, R. Vialle, W. Skalli, France

14:05-14:10  Symptomatic implant/construct failure after metastatic spine tumour surgery  
Naresh Kumar, R.S. Patel, D. Sonawane, J. Song, A.P. Singla, H. Milavec, N. Ravikumar, J. Ruiz, H. Hey, H. Wong

14:10-14:30  Discussion
<table>
<thead>
<tr>
<th>Time</th>
<th>Session/Activity</th>

</table>
| 14:30-15:30 | GENERAL POSTER SESSION  
Location: Gyou (North) (4F)  
Drinks and Coffee will be served during this session |
| 15:30-16:30 | SESSION #11 STENOSIS  
Chairs: Robert Gunzburg & Kotaro Nishida |
| 15:30-15:35 | 64 Intraspinal diffusion tensor imaging parameters in quantitative assessment of patients with lumbar spinal canal stenosis  
| 15:37-15:42 | 65 How does lumbosacral multi-level spondylolytic spondylolisthesis differ from mono-level spondylolytic spondylolisthesis in spino-pelvic sagittal alignment?  
Xu Sun, Q. Zhou, X. Cheng, L. Xu, S. Li, C. Du, B. Qian, Z. Zhu, Y. Yu, B. Wang, Y. Qiu, China |
| 15:44-15:49 | 66 Facet Joint Capsular Laxity in Degenerative Lumbar Spondylolisthesis Associated with the Increased Expression of Fractalkine CX3CL1/CX3CR1 Chemokine  
In-Soo Oh, S. Kim, K. Ha, K. Rhyu, South Korea |
| 15:51-15:56 | 67 Association of hypertrophy of the ligamentum flavum with an increase in myofibroblasts in the dorsal layer of the ligament in lumbar spinal canal stenosis  
Fumio Hayashi, K. Higashino, M. Morimoto, Y. Goda, N. Sato, Y. Morimoto, T. Sakai, Y. Takata, F. Tezuka, K. Sairyo, Japan |
| 15:58-16:03 | 68 Automation of MRI gradings to aid longitudinal studies of lumbar spinal stenosis in the Wakayama Spine Study  
| 16:05-16:10 | 69 The influence of developmental spinal stenosis on reoperation risk at the adjacent segment after decompression surgery for lumbar spinal stenosis  
Jason Pui Yin Cheung, P. Cheung, Hong Kong |
| 16:10-16:30 | Discussion |
| 16:30-17:30 | DEBATE  
**Blended learning vs conventional education for spine specialists and research**  
Chairs: Tom Oxland, Dino Samartzis, Ashish Diwan |
| 17:30-18:30 | Second Business Meeting *(for memers only)* |
| 19:00-21:00 | Banquet  
Location: Suiun (3F) |
FRIDAY JUNE 7

07:00-07:45  Breakfast
Location: Banquet Lobby in front of Gyoun (4F)

07:45-08:45  SPECIAL POSTER SESSION #2F: BIOLOGY
Chairs: James Iatridis & Nam Vo
Location: Small Banquet Hall – Kame (5F)

SPECIAL POSTER SESSION #2G: BIOMECHANICS, BIOLOGY
Chairs: Cornelia Neidlinger-Wilke & Miho Sekiguchi
Location: Small Banquet Hall – Tsuru (5F)

SPECIAL POSTER SESSION #2H: NON-SURGERY
Chairs: Ken Ishii & Fabio Zaina
Location: Small Banquet Hall – Ume (5F)

SPECIAL POSTER SESSION #2I: SURGERY TECHNIQUES
Chairs: Naresh Kumar & Kazuyuki Watanabe
Location: Small Banquet Hall – Take (5F)

SPECIAL POSTER SESSION #2J: INFECTION/OSTEOPOROSIS
Chairs: Koji Akeda & Koji Otani
Location: Small Banquet Hall – Matsu (5F)

09:00-09:10  Report from Focus Groups
Chair: Kazuhiro Chiba

09:10-09:40  Session #12 INFECTION
Chairs: Teija Lund & Masahiro Kanayama

09:10-09:15  Hypoalbuminemia and Elevated CRP as Predictors for Superficial, Deep, and Urinary Tract Infections
Zorica Buser, B. Yoshida, A. Nguyen, B. Formanek, M. Alam, J. Wang, USA

09:17-09:22  Clinical Features and Treatments of Pyogenic Spondylodiscitis with Severe Paralysis
Teppei Hayashi, M. Kato, Japan

09:24-09:29  Avoiding infection and screw loosening due to biofilm at bone-screw interface: Periop measures

09:29-09:40  Discussion

10:10-11:10  Session #13 BASIC SCIENCE, BIOMECHANICS
Chairs: Alejandro Espinoza & Hans-Joachim Wilke

10:10-10:15  Immuno-stimulatory capacity of decorin in the intervertebral disc and the mechanical consequence of resultant inflammation
Diane Gregory, M. Guerreiro, D. Zwambag, S. DeWitte-Orr, Canada

10:17-10:22  810nm low level laser therapy regulating polarization of M1/M2 macrophages and its mechanism
Zhe Wang, J. Zhang, J. Sun, Q. Zheng, X. Hu, China

10:24-10:29  Mechanical characterization of lumbar annulus fibrosus in adolescent idiopathic scoliosis before and after surgical intervention
Claudio Vergari, L. Chanteux, R. Pietton, T. Langlais, R. Skalli, France

10:31-10:36  Cortical trajectory pedicle screws versus traditional trajectory: differences in fatigue loading conditions
Steven T Swinford, T.R. Johnston, A.W. Behn, T.F. Alamin, USA

10:38-10:43  Dysregulated bone marrow stromal cells in Modic type 1 changes
Stefan Dudli, D. Hänni, A. Jüngel, M. Betz, J. Spirig, F. Brunner, M. Farshad, O. Distler, Switzerland

10:45-10:50  High Fat Diet and Leptin Receptor Deficiency have Sex-Dependent Effects on Spinal Structures in a Type 2 Diabetes Mouse Model
Svenja Illien-Junger, D.M. Natelson, D. Krishnamoorthy, J. Iatridis, USA

10:50-11:10  Discussion
<table>

**SPECIAL POSTERS SESSION #1**

**Wednesday June 5 – 07:45 – 08:45**

**SPECIAL POSTER SESSION #1A: BIOLOGY**

**Chairs:** Helena Brisby & Gen Inoue  
**Location:** Small Banquet Hall – Kame (5F)

**SP1**  
**Daphne Hingert**  
Signaling peptides from human mesenchymal stem cells including connective tissue growth factor enhance chondrogenesis in disc cells.

**SP2**  
Nutrient supply and nucleus pulposus cell function: effects of the transport properties of the cartilage endplate and potential implications for intradiscal biologic therapy.

**SP3**  
The role of integrinα5β1 in the alteration of notochordal cell induced by dynamic loading.

**SP4**  
**Mauro Alini**, S. Wangler, M. Peroglio, U. Menzel, L. Benneker, L. Haglund, D. Sakai, S. Grad  
MSC homing into intervertebral discs enhances the Tie2 positive progenitor cell population, prevents cell death and induces a proliferative response.

**SP5**  
Potential involvement of oxidative stress/inflammatory cytokines cascade in ligamentum flavum hypertrophy.

**SP6**  
Genome-wide DNA methylation analysis identifies a differentially methylated profile associated with human intervertebral disc degeneration.

**SPECIAL POSTER SESSION #1B: BIOMECHANICS**

**Chairs:** Fabio Galbusera & Osamu Shirado  
**Location:** Small Banquet Hall – Tsuru (5F)

**SP7**  
**Helena Brisby**, M. Khalil, K. Lagerstrand, H. Hebelka  
Diurnal variation of vertebral T2-time investigated with T2 mapping.

**SP8**  
Disc Degeneration – More Than an Aging Process.

**SP9**  
**Alejandro A Espinoza**, F. Mukhtar, G.B. Andersson, H.S. An, N. Inoue  
Is the Lumbar Spinous Process a Reliable Sagittal Plane Reference Landmark?

**SP10**  
**Harvinder Chhabra**, M. Gupta, A. Pedaballe  
Is the anatomy of failure in lumbar disc herniation clinically relevant?: a prospective study.

**SP11**  
**Claudio Vergari**, M. Karam, R. Pletton, R. Vialle, I. Ghanem, W. Skalli, A. Assi  
Lumbar spine slenderness in adolescent idiopathic scoliosis.

**SP12**  
Does Body Mass Index Affect Spinal Alignment and Low Back Pain in Patients with Primary Osteoporosis?

**SPECIAL POSTER SESSION #1C: REHABILITATION**

**Chairs:** Jiri Dvorak & Hiroshi Hashizume  
**Location:** Small Banquet Hall – Ume (5F)

**SP13**  
A network meta-analysis of effectiveness of specific modes of exercise for chronic low back pain.

**SP14**  

**SP15**  
**Miyako Suzuki**, M. Millecamps, S. Ohtori, L.S. Stone  
Voluntary Physical Activity Reinforces the Efficacy of Acute Non-Steroidal Anti-inflammatory Drug Treatment for Osteoporosis-related Pain in a Mouse Model of Ovariectomy-induced Osteoporosis.
SP16 Michele Battie  Y. Xiao, M. Fortin, J. Ahn, H. Rivaz, T. Peters
Statistical morphometric analysis of lumbar paraspinous muscles in patients with lumbar pathology

Analysis of skeletal muscle mass in women over 40 with degenerative lumbar scoliosis.

SP18 Daniel Chepurin  U. Chamoli, K. Sheldrick, S. Lapkin, D. Scott, J. Kuan, A.D. Diwan
Bony stress in the lumbar spine is associated with disc degeneration and pain in the lower back. A retrospective case-control MRI study of patients under 25-years of age.

SPECIAL POSTER SESSION #1D: DEFORMITY
Chairs: Jason Pui Yin Cheung & Daisuke Togawa
Location: Small Banquet Hall – Take (5F)

SP19 Whoen Jeang Kim S. Hwang, S. Kim, C. Ma, J. Lee, D. Song, K. Park, W. Choy
Prevention of adjacent segmental disease after fusion in degenerative spinal disorder: correlation between segmental lumbar lordosis ratio and PI-LL mismatch for a minimum 5-year follow-up

What factors affect low back pain of patients with Adolescent Idiopathic Scoliosis average 35 years after surgery?

Spinal alignments of non-fused lumbar curve affect the disc degenerations after selective thoracic fusion in the patients with adolescent idiopathic scoliosis with a minimum 5-year follow-up

SP22 Daisuke Togawa S. Oe, T. Hasegawa, Y. Yamato, G. Yoshida, T. Banno, H. Arima, Y. Mihara, H. Ushirozako, Y. Matsuyama
What Made Differences between Best and Worst Clinical Results for Adult Spinal Deformity Patients: 2-Year Follow-Up

Multimodal Analyses Were Required to Understand the Complaints of Adult Spinal Deformity Patients

Impact of correction surgery on activities of daily living related to Oriental life-style in adult spinal deformity patients. Survey with original ADL questionnaire.

SPECIAL POSTER SESSION #1E: SURGERY OUTCOMES
Chairs: Christopher Bono & Kazuhiro Hasegawa
Location: Small Banquet Hall – Matsu (5F)

Performance-Based Tests as Predictors of Patient-Reported Outcomes at 1-Year Following Lumbar Spine Surgery

SP26 Max Jakobsson H. Brisby, A. Gutke, M. Lindberg, R. Smeets
Physical capacity tasks assessing functional status in patients scheduled for lumbar fusion surgery were not associated with depression, pain catastrophizing, and fear of movement

SP27 Tetsuro Ohba S. Ebata, H. Oba, K. Koyama, H. Haro
Predictors of poor Global Alignment and Proportion score after surgery for adult spinal deformity

SP28 Steven M Presciutti T. Doan, M. Teklemariam, S. Sangadala, S.D. Boden, H. Drissi
The Spatial and Temporal Expression of Sclerostin and Canonical Wnt Signaling Factors in the Maturing Posterolateral Spine Fusion

SP29 Ji-Won Kwon J. Lee, J. Yang, K. Suk, H. Kim, S. Moon, H. Lee, B. Lee
Intraoperative real-time stress analysis using EEG and heart rate over 800 surgeries; multicenter prospective study among 12 orthopedic surgeons

SP30 Srikanth N Divi D.K. Goyal, M.S. Galetta, C.K. Kepler, A.R. Vaccaro, G.D. Schroeder
Patient outcomes following short-segment lumbar fusion are not affected by PI-LL mismatch
SPECIAL POSTERS SESSION #2
Friday June 7 – 07:45 – 08:45

SPECIAL POSTER SESSION #2F: BIOLOGY
Chairs: James Iatridis & Nam Vo
Location: Small Banquet Hall – Kame (5F)

SP31 Jianru Wang F. Chen, Z. Zheng
Paraoxonase 1 (PON1) was negatively associated with intervertebral disc degeneration (IVDD).
